

HOW TO: USING GUEST MODE ON CHROMEBOOK

Turn on the Chromebook. This is your startup screen.

Use the Guest mode for quick secure access or choose a language/keyboard.

Chromebook will connect to T-mobile or connect to your local WiFi network.

Add your personal user account by clicking "Add Person". All information is securely saved with your password.

To remove the user you added, at the bottom right, select the time. Click **Sign out** and remove user account from the Start Up screen by clicking the drop down near name, click shut down
